## EXPERIENCE

### Booking.com, Netherlands — Engineering Manager Jan 2023 - Present

Leading software development team to build innovative financial solutions for hotels, balancing technical execution with team growth, efficiency, and modern tooling.

- **Data-Driven Execution:** Optimize engineering velocity and diagnose bottlenecks using metrics-informed insights to consistently deliver secure, scalable systems.
- **AI Workflow Integration:** Leverage multiple AI tools and LLMs to automate routine administrative tasks and create efficient workflows that accelerate code generation and simplify complex technical investigations.
- **Talent Development:** Foster a high-trust culture of psychological safety, providing active coaching and mentorship to accelerate engineers' career progression.

### Elsevier, the Netherlands — Software Engineering Lead Feb 2022 - Dec 2022

Funding Domain helps institutions, researchers, and funders for the best funding data experience. We provide funding data with commercial APIs and micro-frontend technologies as plug-and-play and configurable methodology with a low-code framework.

### Elsevier, Netherlands — Senior Software Engineer Nov 2018 - Feb 2022

Adapting micro service architecture for modular components using Spring Boot and React with CI/CD pipelines running on AWS environment. Working with self-manageable teams and DevOps culture.

In Research Data Management(RDM), creating and transforming software solutions to make sharing Datasets easy for academic articles and authors.. In Funding Domain, create custom solutions for the institutions that require special needs for fundings and fingerprints.

### Yapi Kredi Technology, Turkey — Senior Software Engineer Dec 2016 - Nov 2018

- **Backend & Microservices:** Engineered scalable FinTech solutions using Java, Spring Boot/Cloud, and Pivotal Cloud Foundry (PCF), enforcing clean code, TDD, and robust CI/CD pipelines.
- **Mobile Innovation:** Spearheaded the UX/UI redesign of iOS and Android applications and successfully integrated Europe's first "eye-verify" biometric login system.
- **Tech Stack:** Java, Spring Ecosystem, Netflix OSS, Swift 3, Android, Oracle, Redis, PCF, Jenkins/Bamboo, Maven/Gradle, Git.

### Garanti Technology, Turkey — Senior Software Engineer Jul 2012 - Dec 2016

Full-Stack Developer responsible for the end-to-end development of Garanti BBVA's high-traffic public website and secure user forms. Pioneered wearable financial tech by engineering Turkey's first-ever Google Glass banking application, and expanded the bank's digital ecosystem through custom social media API integrations (Facebook, Twitter).

### Netz Sp. Zo., Poland — Software Engineer as Intern Jul 2011 - Oct 2011

Tasked to develop a mail client application connected with a native Android app to handle the communication between the clients and CRM including the location tracking.

## EDUCATION

### Computer Engineering, Ege University, Turkey — 3.41/5

2007 - 2012

The thesis is to integrate three bug-tracking systems using common Ontology.

## TALENT

Data-Driven Leadership · People-First Mentorship · Strategic Technical Roadmaps · Operational Efficiency · Psychological Safety

Event-Driven Systems · Legacy Modernization · End-to-End System Ownership · FinTech Solutions · Partner Automation

**Cloud:** AWS, Kubernetes, IaC (Terraform)

**Backend:** Java, Spring Boot, Microservices

**Data:** ElasticSearch, PostgreSQL, MySQL, DynamoDB.

**Frontend/Mobile:** React, Android & iOS Development

## LANGUAGE

English(Proficient C1),  
Turkish(Native),  
Dutch(Beginner A1-2)

## HOBBIES

Listening to music, Reading (Physical) Books, Travelling abroad, Watching Movies in Theatre, Cycling and 3D printing.
